

1993-98 Immigration in Southeast Michigan

The Southeast Michigan Census Council recently obtained data which show the country of origin and intended ZIP code of residence for immigrants to southeast Michigan. The data cover all ZIP codes between 48001 and 48399.

These data have been published in a report which shows total immigration and the twenty countries with the highest immigration levels to this area. These twenty-one figures are presented for each ZIP code. The report also includes some additional immigration data for the total area. An accompanying report presents immigration trends at the national level. A companion report showing immigration by country and ZIP code during the 1983-92 period is also available.

Copies of the 1993-98 report, along with the national report, may be purchased for \$25, including shipping. The companion report for 1983-92 is \$20. You may print this page, fill out the form, and mail it to SEMCC, or you may place your order by fax, telephone, or email.
